

SILVERGUARD 4 PROXIMITY WAND (SG4P)

The SilverGuard 4 Proximity (SG4P) Wand: Record the date and time of the patrol by passing the SG4P over SilverGuard Proximity (RFID) Checkpoints that can be mounted to or embedded behind most walls. Download data using a SilverGuard Computer Transfer Station (CTS) to store and produce a variety of reports. Available in both 110V and 220V for worldwide operation.

- Reads 125KHZ RF proximity checkpoints of varying sizes
- Downloads via the Computer Transfer Station to produce a variety of reports
- (Activity, Scanned, Missed, Incidence and Personnel Accountability reports)
- Durable plastic housing consisting of ABS+PC
- Long life lithium battery: 3 Volts C size lithium
- Capacity: 5000 reads in all formats
- Visual and audible confirmation
- Operating temperature: - 30° to 80° Celsius
- Memory: 128 SRAM, Processor: ds5001@11MHZ
- Weight: 6oz/168g; Length: 5.5 in/13.94cm; Diameter: 1in/2.54cm
- Checkpoints can be embedded behind any non metallic surface
- Wide range of applications
