

## TOUCH CHECKPOINT

**The Touch Checkpoint:** A rugged checkpoint that meets all demands. Used with the SilverGuard 1 or SilverGuard 4T Wands, the Touch Checkpoints are read through momentary contact with the wand until audible and visual confirmation is achieved. Download the patrol data using the SilverGuard Computer Transfer Station (CTS) which can produce a variety of reports. The One Touch Checkpoints are built to withstand the most extreme conditions.

- The iButton media tag is manufactured by Dallas Semiconductor
- Uses a 48-bit unique serial number chip
- Housed in a button shaped stainless steel casing
- Diameter: 17.35mm; Thickness : 5.89mm
- Operating Temperature : -40° to 85° Celsius
- Read by momentary contact with wand
- No external power required
- Water and shock resistant
- These buttons are usually mounted with two-sided adhesive pads or plastic mounts
- Available as Guard Identification Tag
- Applications range from guard patrol to inventory tagging
